Dear Mr. Parkinson,

Please take note.

Biochemical consequences of glucocerebrosidase 1 mutations in Parkinson’s disease  Page 726
Perspectives

701 Could mammalian inorganic polyphosphate be a crucial signaling molecule in neurological disorders?
Renata Torres Da Costa, Maria E. Solesio

703 Use of an immunocapture device to detect cytokine release in discrete brain regions
Matthew G. Frank, Michael V. Baratta

705 New immune regulators of sciatic nerve regeneration? Lessons from the neighborhood
André L. Bombeiro, Rodrigo G.Q. Fernandes, Julie C. Ribot

707 Multifunctional glycolipids as multi-targeting therapeutics for neural regeneration
Yutaka Itokazu

709 Astrocytes dynamically regulate the blood-brain barrier in the healthy brain
Agne Paciute, Augustas Pivoriunas, Alexei Verkhratsky

715 Implications of regional identity for neural stem and progenitor cell transplantation in the injured or diseased nervous system
Prakruthi Amar Kumar, Jennifer N. Dulin

711 Epigenetic memory of drug exposure history controls neural stem cell quiescence in the adult brain
Masakazu Iwamoto, Taito Matsuda

713 Topical ocular administration of DPP-IV inhibitors: a new approach for treating diabetes-induced retinal neurodegeneration
Rafael Simó, Cristina Hernández

719 A perspective on age-related changes in cell environment and risk of neurodegenerative diseases
Alice Y. Liu

721 ATP-binding cassette transporters as possible targets for the intervention of neurodegenerative diseases
Hiu Chuen Lok, Glenda M. Halliday, Woojin Scott Kim

723 Current controversies in glia-to-neuron conversion therapy in neurodegenerative diseases
Peng Cao, Jianan Li, Zhuxi Liu, Guobiao Liang

725 Biochemical consequences of glucocerebrosidase 1 mutations in Parkinson’s disease
Jeong Hyun Yoon, Chiao-Yin Lee, Anthony HV Schapira

717 Artificial intelligence analysis of videos to augment clinical assessment: an overview
David C. Wong, Stefan Williams

728 Commentary on “Synchronized activity of sensory neurons initiates cortical synchrony in a model of neuropathic pain”
Lorenzo Di Cesare Mannelli, Carla Ghelardini

Reviews

729 Autophagy in neural stem cells and glia for brain health and diseases
Aarti Nagayach, Chenran Wang

774 Versatile strategies for adult neurogenesis: avenues to repair the injured brain
Junyi Zhao, Siyu Liu, Xianyuan Xiong, Xinzhou Zhu

781 Succinylation modification: a potential therapeutic target in stroke
Jie Liu, Wenwu Liu, Qin Hu, Xiaohua Zhang

788 Cannabinoids and endocannabinoids as therapeutics for nervous system disorders: preclinical models and clinical studies
R. Scott Duncan, Sean M. Riordan, Matthew C. Gernon, Peter Koulen

774 Versatile strategies for adult neurogenesis: avenues to repair the injured brain
Xiaoyan Liu, Yi Liu, Junlin Liu, Hantao Zhang, Chaofan Shan, Yinglu Guo, Xun Gong, Mengmeng Cui, Xiubin Li, Min Tang
Contents

855 Pathological and physiological functional cross-talks of α-synuclein and tau in the central nervous system
Mingyue Jin, Shengming Wang, Xiaodie Gao, Zhenyou Zou, Shinji Hirotsune, Liyuan Sun

846 Genetic and epigenetic targets of natural dietary compounds as anti-Alzheimer’s agents
William Orlando Castillo-Ordoñez, Nohelia Cajas-Salazar, Mayra Alejandra Velasco-Reyes

747 Skeletal muscle as a molecular and cellular biomarker of disease progression in amyotrophic lateral sclerosis: a narrative review
Peter H. King

800 The pathogenic mechanism of TAR DNA-binding protein 43 (TDP-43) in amyotrophic lateral sclerosis
Xinxin Wang, Yushu Hu, Renshi Xu

811 In vivo imaging of the neuronal response to spinal cord injury: a narrative review
Junhao Deng, Chang Sun, Ying Zheng, Jianpeng Gao, Xiang Cui, Yu Wang, Licheng Zhang, Peifu Tang

818 Regenerative medicine strategies for chronic complete spinal cord injury
Shogo Hashimoto, Naruhito Nagoshi, Masaya Nakamura, Hideyuki Okano

807 Cell replacement with stem cell-derived retinal ganglion cells from different protocols
Ziming Luo, Kun-Che Chang

Research Articles

863 Rbm8a regulates neurogenesis and reduces Alzheimer’s disease-associated pathology in the dentate gyrus of 5xFAD mice
Chenlu Zhu, Xiao Ren, Chen Liu, Yawei Liu, Yonggang Wang

872 Long non-coding RNA H19 regulates neurogenesis of induced neural stem cells in a mouse model of closed head injury
Mou Gao, Qin Dong, Zhijun Yang, Dan Zou, Yujian Han, Zhanfeng Chen, Ruxiang Xu

881 Activation of cerebral Ras-related C3 botulinum toxin substrate (Rac) 1 promotes post-ischemic stroke functional recovery in aged mice
Fan Bu, Jia-Wei Min, Md Abdur Razzque, Ahmad El Ramamy, Anthony Patrizz, Li Qi, Akihiko Urayama, Jun Li

900 Human umbilical cord mesenchymal stem cell-derived exosomes loaded into a composite conduit promote functional recovery after peripheral nerve injury in rats
Haoshuai Tang, Junjin Li, Hongda Wang, Jie Ren, Han Ding, Jun Shang, Min Wang, Zhijian Wei, Shiqing Feng

4 Neurodegenerative Diseases and Neural Regeneration

908 Multiple factors to assist human-derived induced pluripotent stem cells to efficiently differentiate into midbrain dopaminergic neurons
Yalan Chen, Junxin Kuang, Yimei Niu, Hongyao Zhu, Xiaoxia Chen, Kwok-Fai So, Anding Xu, Lingling Shi

915 STAT3 ameliorates truncated tau-induced cognitive deficits
Bingge Zhang, Huali Wan, Maimaitijiang Maierwufu, Qian Liu, Ting Li, Ye He, Xin Wang, Gongping Liu, Xiaoyue Hong, Qiong Feng

Optic Nerve Injury and Neural Regeneration

923 Anti-vascular endothelial growth factor drugs combined with laser photocoagulation maintain retinal ganglion cell integrity in patients with diabetic macular edema: study protocol for a prospective, non-randomized, controlled clinical trial
Xiangjun Li, Chunyan Li, Hai Huang, Dan Bai, Jingyi Wang, Anqi Chen, Yu Gong, Ying Leng
